AI/ML DEVELOPER

Aspiring AI/ML developer with a solid foundation in Python, data structures, and machine learning fundamentals. Focused on understanding and applying algorithms to build intelligent, data-driven solutions. Actively learning and refining skills through practical implementation and continuous experimentation.
Strong problem-solving mindset with the ability to break down complex tasks into efficient, scalable solutions. Familiar with working on end-to-end implementations, from data preprocessing to model evaluation

PROJECTS

FLAPPY BIRD AI AGENT

Python | Q-Learning | Custom Environment
Mar 2026 - Present

- Developed a reinforcement learning agent using Q-learning to play Flappy Bird
- Designed reward mechanisms and optimized state-action policies to improve performance
- Trained the agent over multiple episodes, significantly increasing average survival time and stability

IMAGE CLASSIFICATION USING CNN (CIFAR-10)

Python | PyTorch | Deep Learning
Feb 2026 - Mar 2026

- Built a Convolutional Neural Network (CNN) to classify images from the CIFAR-10 dataset
- Applied data preprocessing and hyperparameter tuning to improve model performance
- Achieved ~80% classification accuracy on the validation dataset

CUSTOMER CHURN PREDICTION

Python | Scikit-learn | Machine Learning
Jan 2026 – Feb 2026

- Developed a machine learning model to predict customer churn using structured data
- Performed data preprocessing, feature engineering, and model training using classification algorithms
- Achieved ~86% accuracy, evaluated using precision, recall, and confusion matrix
-

RELEVANT SKILLS

- Programming Languages: Python, C++, JavaScript
- Machine Learning: Supervised Learning, Classification, Model Evaluation
- Deep Learning: CNN, Neural Networks
- Reinforcement Learning: Q-Learning
- Libraries & Tools: NumPy, Pandas, Scikit-learn, TensorFlow / PyTorch
- Web Development (MERN): MongoDB, Express.js, React, Node.js
- Tools: Git, GitHub
- Core Concepts: Data Structures & Algorithms

EDUCATIONAL HISTORY

BACHELOR IN COMPUTER SCIENCE

Maharaja Surajmal Institute of Technology,
2024 - 2028

ACHIEVEMENTS

DSA

Solved 150+ data structures and algorithms problems and developed hands-on experience in machine learning through real-
